DC-8 EXP

An expert you can rely on

By touching all aspects of acoustic acquisition and image processing, DC-8 Expert is built on a completely new ultrasound architecture that can dynamically optimize the imaging capability to acquire remarkable images on a variety of patient types. This extraordinary architecture fully empowers more innovative technologies, such as ART Flow™ for deep vascular visualization, and Mindray's new Echo Boost technology for intelligent optimization of images across multiple applications.

Radiology

DC-70 – DIAGNOSTIC ULTRASOUND SYSTEM

Quality exams at your fingertips

Good image quality is prime for a promising ultrasound. DC-70 offers that and a lot more. Its unique touch gesture feature is designed to help improve workflow, provide you with ease and certainty, enabling you to put patient care first. The clarity, as a result of innovative transducer technology on DC-70, would help you detect abnormalities or small pathologies. Ease-of-use tools including a number of auto measurement packages, would help you reduce scan time, standardize exam protocols, enhance productivity with added patient focus.

Obstetrics & Gynecology

iLive™, Smart OB/NT™, Volume Data Analysis

HR Flow™, Natural Touch Elastography, iScape™, iNeedle™

Cardiology

Echo Boost™, TDI&QA, Strain/Strain Rate, Stress Echo

M7 Ultrasound Portable

The M7 embodies the optimal combination of advanced imaging technologies and miniaturization technologies.

DC-T6 Color Doppler

The DC-T6 is a fully featured color Doppler system designed for mobility. Mindray's ultrasound system DC-T6 brings the performance and diversity you need in today's medical environment.

M5 Ultrasound Portable

The M5 offers uncompromised 2D performance and exceptional value in a highly convenient and easy to use package.

DC-N3 Color Doppler

The DC-N3 is equipped with advanced technologies that guarantee excellent performance. It is a unique system that is setting new standards in this segment. Serving a wide variety of diagnostic requirements with a broad range of transducers.

DC-8 Color Doppler

The DC-8 integrates the best of technology, quality and ergonomics, providing you with a unique scanning experience. Be it a fetal biometry analysis or showing parents the first image of their child, the DC-8 has it all.

Z6 Ultrasound Portable

The Z6 demonstrates an ideal combination of image enhancing technologies and convenient workflow applications.

DP-50 Ultrasound B/W

The DP-50 is a superior black & white ultrasound system that allows you to do more in less time without compromises.

DP-7 Ultrasound B/W

The DP-7 ultrasound system offers a wide range of clinical capabilities that promote a higher level of performance. When you combine excellent image quality with the system versatility and intelligent workflow, it equals great productivity.

M9 – PORTABLE ULTRASOUND SYSTEM

Boundless mobility

Based on Mindray's new generation ultrasound platform, mQuadro, M9 has raised the industry standards to an all new level. Advanced signal transmission and reception processors provide highly sensitive and accurate echo detection. Innovative transducer technologies allow for better penetration, higher resolution, greatly enhancing your diagnostic experience.
