

Z60

Ultrasound System

Quality. Speed. Flexibility.

Versatility and adaptability

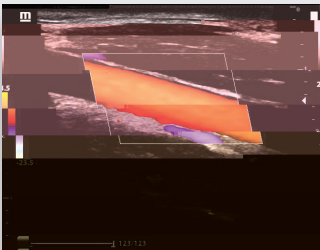

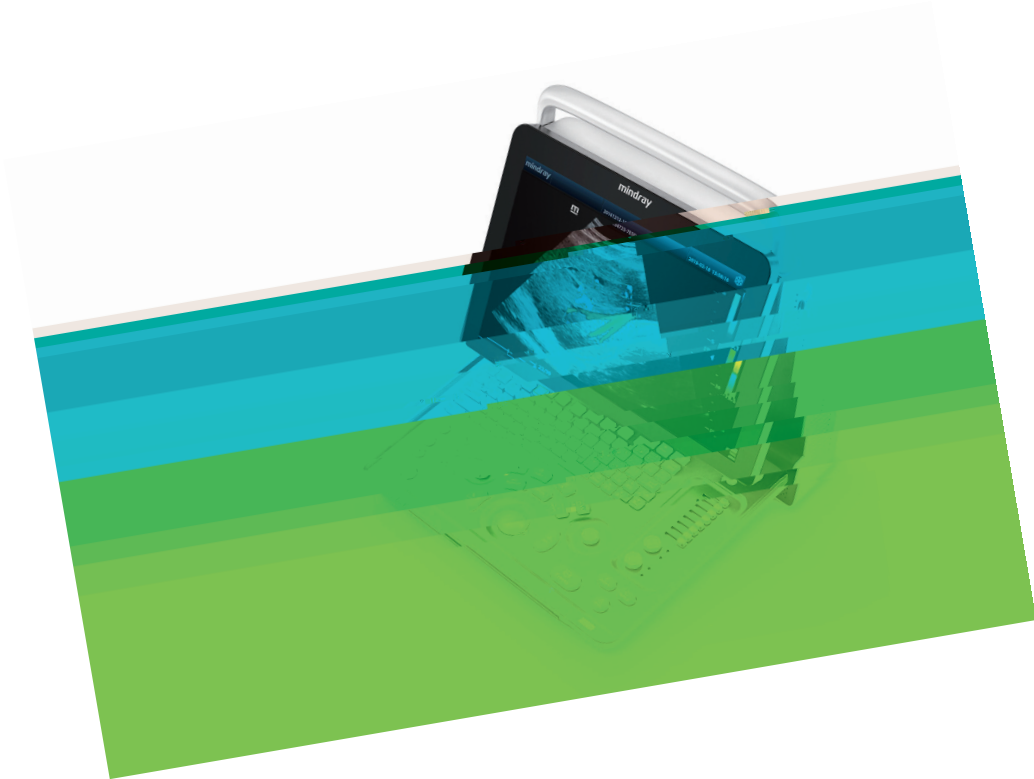

The Z60 Ultrasound System is a versatile, hand-carried Color Doppler System that successfully blends powerful software packages, transducer technology, and ease-of-use. This ergonomic and compact solution makes it possible to examine your patients anywhere and anytime, without compromise.

In today's demanding environment, it takes innovative technology to achieve rapid diagnoses with high levels of confidence. With exquisite design utilizing the latest technologies, the Z60 System expands clinical capabilities and meets your evolving professional needs now and into the future.

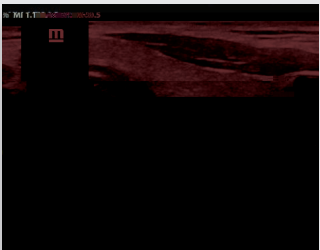

Diagnostic confidence with advanced imaging technologies

- Dynamic Beam Forming
- iBeam™ Spatial Compounding Imaging
- iClear™ Speckle Reduction Imaging
- Tissue Harmonic Imaging (PSHI)
- Tissue Specific Imaging (TSI)
- B Steer, Trapezoid Imaging, Colorization
- iScape, Panoramic View
- 3D/4D Options
