- 100% screen-to-body ratio
- 24-hour emergency call
- Health monitoring app
- ECG, SpO2, PPG, etc.

Key Features

The BeneVision N1 is a portable medical monitoring device designed for use in various clinical settings. It features a large, high-resolution touchscreen display that provides a clear and intuitive view of patient data. The device is equipped with a variety of sensors, including an ECG sensor, a pulse oximeter, and a non-invasive blood pressure (NIBP) sensor. These sensors allow for real-time monitoring of vital signs, ensuring that healthcare providers can quickly identify and respond to any changes in a patient's condition. The BeneVision N1 also includes a built-in camera for patient identification and documentation. Its compact and lightweight design makes it easy to carry and use in a wide range of environments, from the hospital to the home. The device is powered by a long-lasting battery, ensuring that it can be used for extended periods without the need for frequent recharging. Overall, the BeneVision N1 is a reliable and user-friendly medical monitoring device that can help improve patient care and outcomes.
